

Central Finland Mobility Foundation (Cefmof) announces plan to construct a Hydrogen station in Jyväskylä, Finland, late Summer 2025

Jyväskylä, Finland (April 21, 2025) Central Finland Mobility Foundation (Cefmof¹), established by Toyota Mobility Foundation (TMF), the city of Jyväskylä, Finland, and TOYOTA GAZOO Racing World Rally Team (TGR-WRT) and working to create a sustainable society through achieving carbon neutrality, is pleased to announce that there has been progress regarding the hydrogen demonstration project², first announced [September 2024](#).

¹ [Introducing the newly established Cefmof](#)

² [Introducing hydrogen demonstration project with stakeholders](#)

Cefmof will play a leading role in constructing a hydrogen refueling station scheduled to open by the end of Summer 2025.

This hydrogen station will support Finland's first pilot project for a wide range of public transport using clean hydrogen fuel, able to refuel not only large vehicles, such as buses and trucks, but also smaller vehicles, such as taxis and vans.

This project will be an important step towards a sustainable future by creating the foundation for a green hydrogen ecosystem in Central Finland. For more details, please refer to the Cefmof press release below³.

About Toyota Mobility Foundation

TMF is committed to contributing to a sustainable society by leveraging the technologies and expertise gained from our various projects and working with a diverse range of partners to promote activities aligned with the United Nations' Sustainable Development Goals (SDGs). TMF (Chair Akio Toyoda) was established in August 2014 by the Toyota Motor Corporation (Toyota) to support the development of a more mobile society in which everyone can move freely. The Foundation underscores Toyota's ongoing commitment to continuous improvement and respect for people. It utilizes Toyota's expertise and technologies to support strong mobility systems while eliminating disparities in mobility. TMF works in partnership with universities, governments, non-profits, research institutions and other organizations, creating programs that are aligned with the UN Sustainable Development Goals (SDGs) to address mobility issues around the world. "TMF aims to create a truly mobile society that will help people live better lives no matter where they are," said Chair Akio Toyoda.
